Sensys Gatso invites to a partner and customer day

Sensys Gatso Group, a global leader in traffic safety solutions, will be hosting a partner and customer day on March 19th at its Haarlem, Netherlands location.

With Intertraffic Amsterdam 2018 upon us, it is the perfect opportunity for Sensys Gatso to visit with many of its valued customers and strategic business partners. One full day is dedicated to sharing its global portfolio of traffic enforcement solutions and to provide a preview of the exciting innovations that will shape future activities at Sensys Gatso.

The event is by invitation only and will take place on Monday, March 19th at Sensys Gatso's offices in Haarlem, only a 20 minute drive from the exhibition grounds in Amsterdam.

For the remainder of the week Sensys Gatso's doors will be open for other interested parties. If you would like to take the opportunity to meet with the Sensys Gatso team, please send an email to info@sensysgatso.com.

At the Intertraffic show Sensys Gatso will present live demonstrations of its T-series in-vehicle system, together with its French partner Fareco. "The T-series in-vehicle system is robust, state-of-the-art technology. It's hugely appreciated by our customers to provide reliable and efficient traffic enforcement from within a driving vehicle. Without extensive training, a first time user is capable of operating the system within minutes", says Joris Lampe, Chief Commercial Officer of Sensys Gatso.

The system is part of the new T-series platform which was first introduced in 2015 offering fixed, mobile and in-vehicle solutions. So far T-series solutions have been sold in 37 markets. The system is type-approved in more than 10 countries.
