

Press release 4th of December, 2018

Sensys Gatso Group launches FLUX, the unprecedented, scalable traffic enforcement platform for the future

Sensys Gatso Group, a global leader in traffic safety solutions, announces at Gulf Traffic 2018 in Dubai the launch of its newest traffic enforcement platform, FLUX.

Sensys Gatso has developed a traffic enforcement platform that's ready for the demands of tomorrow. FLUX, enters the traffic safety market first by addressing one of the leading causes of road crashes and casualties – Distracted Driving. This functionality will empower authorities by giving them the ability to automatically detect the use of mobile phones while driving. This is a game changer for the industry.

The innovative FLUX enforcement platform marries a scalable software application and a modular hardware system with an intelligent agent providing connectivity to a multitude of sensors, now and in the future. With its modular and software-oriented approach, Sensys Gatso FLUX operates independently of hardware. This new platform manages the ever growing list of traffic enforcement requirements, such as; distracted driving applications, uninsured vehicle enforcement, ANPR, as well as traditional speed and red-light enforcement applications.

"By incorporating FLUX into your enforcement programs, we are providing you with a solution that will fit your requirements, now and in the years ahead. Completely adaptable, you can add new features and sensors at any time, regardless of whether it's with a Sensys Gatso device, or someone else's. One of the main development goals of FLUX was to deliver our customers with a valid and trustworthy piece of evidence that will hold up in court." says Timo Gatsonides, CTO, Sensys Gatso Group.
